Live. Life. Outside.

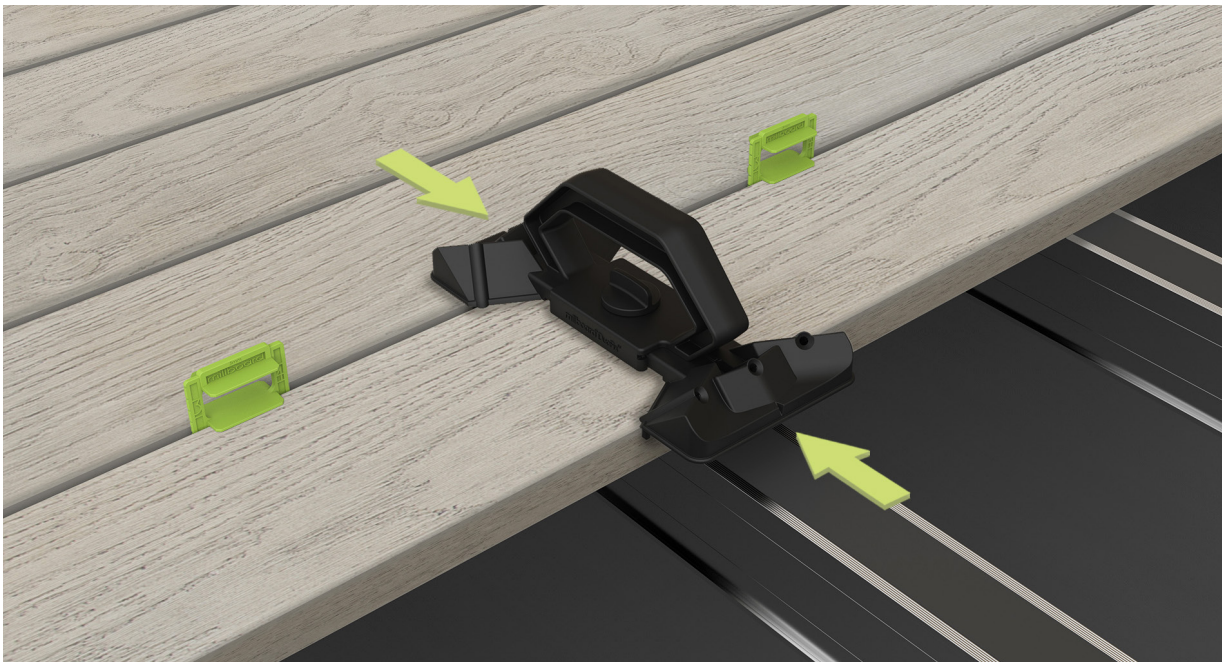

Installation Guide for
DuoFix

1

- If the first board is up against a wall this will need to be face fixed, finishing the DuraFix screw head 5mm below the surface
- Insert the Multi-Spacers in the gap between the first and second board with a 6mm spacing
- Push the board up to the multi spacer

2

- Lay the DuoFix Side-Fixing Guide onto the board, with the raised sections on the underside of the guide set on either side of the board
- Push the ends of the Guide tight up the sides of the decking board

3

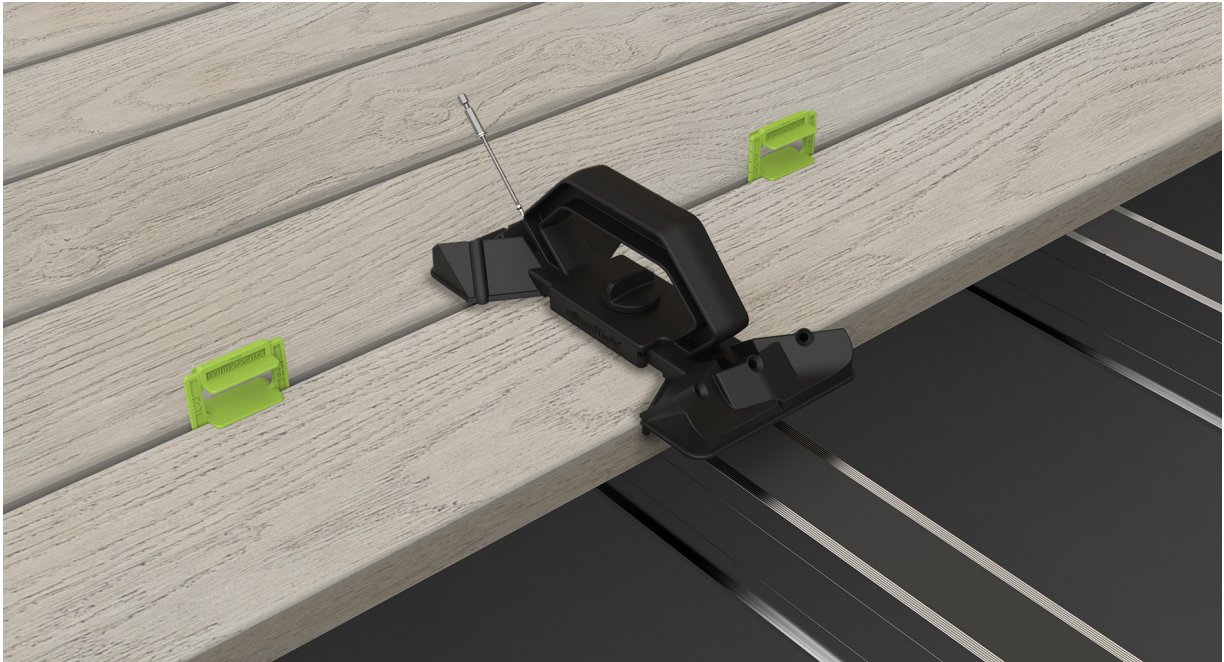

- Turn the thumbscrew clockwise to set the size to the board width
- This may need to be adjusted when fixing the boards

4

- Using a drill with the DuoFix Driver Bit, fix the outside edge of the board using a DuraFix fixing through the central hole in the Guide
- Apply pressure to the DuoFix Guide whilst fixing
- Stop when the Driver Bit collar touches the Guide

5

- Fix the back edge of the board in the same manner
- Fix the board to the remaining joists using a fixing on both sides of the board, fixing at every joist intersection

6

- The diagonal holes are to be used when the central holes cannot be used (i.e. when up against a wall)
