Enhanced Grain Smoked Oak

Discover

the beauty of outdoor living

Because we believe that there is nothing as beautiful as the appearance of wood's natural grain, we've spent years perfecting an outdoor alternative that's just as attractive as the real thing, without the flaws of natural products.

Within these pages, you're invited to discover the Millboard collection in all its glory, from our stunning weathered creations that capture the character of hundred-year-old oak, to a contemporary burned-effect design, coastal-inspired looks and beyond.

Plus you'll also find outdoor inspiration to help you enjoy your space in style all year round.

What is Millboard?

Millboard® combines the natural beauty of real timber with the high performance of our unique wood-free material.

Millboard is wood-free and non-porous, which means high resistance to algae growth and excellent anti-slip properties.

The dual-tone Lastane® surface is coloured by hand using pigments designed to resist fading and sun damage.

The unique Lastane® layer resists scratches and stains and is designed to withstand demanding outdoor environments.

The structural core is a blend of natural minerals bonded in a polymer resin with long fibre reinforcement for added strength and durability.

Millboard is solid, not hollow, meaning it's strong and won't warp or rot like wood.

Our unique 'cellular' internal structure reduces weight while maintaining strength.

Where even the highest quality hardwood can warp, fade and lose its original appeal over time, Millboard is crafted using sustainable composite, designed for outdoor conditions. Made from Lastane®, the textured top surface creates a resilient, virtually maintenance-free layer, designed to resist algae and prevent slipping, even in wet conditions.

Beneath this durable top layer lies a wood-free polymer resin core, reinforced with fibre for extra strength and durability. Millboard is solid rather than hollow, which means that it won't expand or contract, warp or rot, like timber or composites made using wood. And because Millboard is made in Britain using innovative techniques, it's officially more eco-friendly too.

Ordering samples

There's nothing like seeing Millboard for yourself, so before you order, why not take advantage of our sample service?

Order up to three samples and we'll deliver them to your home, absolutely free.

www.millboard.co.uk/freesamples

Because we truly believe that British craftsmanship is the world's finest, every Millboard is expertly designed and made by our team in Warwickshire.

The distinctive look of Millboard takes skill, impeccable attention to detail and patience to achieve.

The journey begins with real timber, which we source from the local area and carefully select by hand, paying particular attention to the subtle nuances of the natural grain. These timbers are then used to create the moulds for Millboard, enabling us to replicate the natural character of the original wood in our unique composite material.

Now our team of craftsmen can get to work transforming the raw Millboard into the designs for our collections. To recreate the authentic look of hardwood, we carefully match the colour, using multiple tinted hues for depth and subtle variation, ageing and weathering. The beautiful, finished Millboard is just like the real thing, but made to last for years to come.

Golden Oak

The art of escapism

Inspiring ideas for creating an outdoor retreat where you'll want to linger a little longer.

← Some like it hot

You needn't be naturally green-fingered, or go on holiday, to enjoy lush, year-round surrounds. Some tropical plant varieties are actually easier to take care of than our native British flora and fauna, and their striking, architectural leaves are high on impact. Look out for hardy palms, ferns and grasses – great for withstanding harsh winters.

↓ Take inspiration from far-flung shores

With a few key accessories, any space can take on a new lease of life. Sculptural Moroccan lanterns, ornate metalwork and coloured glass create an atmospheric, exotic feel, and it's a look that's equally at home in large and small spaces.

→ When the sun goes down

Rather than retreating indoors after dark, transform your outdoor space into a light-filled, open-air room. Dot candles among shrubs, along the edge of Millboard spaces and walls to create atmosphere and ambiance. Old jam jars make a quick and quirky alternative to tealight holders.

A fresh twist on a childhood favourite

HOW TO MAKE THE PERFECT SUMMERTIME MINT LEMONADE

Homemade lemonade is the perfect crowd-pleaser and incredibly easy to make. Simply place a handful of fresh mint leaves into a tea towel and bruise with a rolling pin to release the zingy aroma. Pop it into a pitcher and squeeze in the juice of six lemons, plus a little zest, and add a good glug of sugarcane syrup. Top up with sparkling water, throw in plenty of ice and serve. Delicious.

Coppered Oak

Beautifully aged yet utterly timeless, our handcrafted Weathered Oak collection is moulded from 100-year-old reclaimed oak timber, creating a distinctive worn look – without the wait.

Millboard Weathered Oak

GET THE LOOK Perfect hideaway

MILLBOARD MAKES PUTTING YOUR PERSONAL STAMP ONTO ANY SPACE SIMPLE.

If your garden or patio is a single rectangular area, add character by creating smaller zones, and experiment with raised areas for a more interesting flow. Plant-filled dividers enable you to play with scale and break up a larger area into 'rooms', creating a versatile outdoor space adaptable for different uses and moods.

⬇️ Mix it up with eclectic accessories

Handcrafted pieces such as this unusual stool, carved from a tree trunk, add personality and a dash of well-travelled chic.

⬅️ Reflect your personal style

A shabby-chic mirror dressed with delicate fairy lights makes an eye-catching feature, day or night, and is a simple trick for adding a sense of light and space to smaller areas. Why not trail with climbing plants for a pretty alternative to a trellis?

Inspired by the traditional Japanese Shou Sugi Ban technique, where timber's surface is burned to create a striking and long-lasting finish, our Carbonised collection combines practicality with raw beauty. Choose from a smoother, charred look or dramatic embered effect.

Millboard Carbonised

Embered Board size: 200 x 3600 x 32mm
Charred Board size: 176 x 3600 x 32mm
Colour shown above: Embered

Charred

Charred

⬆️ **Clean lines and monochrome**

Millboard Carbonised is the perfect partner for contemporary outdoor spaces. Mix and match rough and smooth textures, matt and glossy, light and dark, for an on-trend edge.

Choose from two distinctive finishes to suit your style and space.

Bring the indoors out

Glossy metal furniture makes a sleek alternative to traditional natural materials. Choose sculptural, modernist pieces, such as the iconic Eames design, and go for chrome, black or white designs that show off the silhouette.

In perfect balance

A cool, monochrome palette creates the perfect backdrop for playful lighting. Continue the Japanese-inspired theme of the Millboard Carbonised collection with paper lanterns, or inject a shot of colour with a delicate garland.

MILLBOARD IS HIGHLY UV STABLE. SO OVERTIME CHANGES IN TONE ARE MINIMAL

Dramatic effect

Create an outdoor space as style-conscious and contemporary as the rest of your home, with bold design details and on-trend finishing touches.

GET THE LOOK
New heights

THE MILLBOARD COLLECTION'S VERSATILITY MEANS THAT, WHEN IT COMES TO CREATIVITY, THE SKY'S THE LIMIT.

Why stop the fun at your floor space? Create an urban oasis with a Millboard-lined, plant-filled statement wall, or keep it chic and simple by using different colours and textures to create zones within larger spaces. Continuing the same Millboard style up terrace walls gives the illusion of more space.

Millboard Lasta-Grip®

Our Lasta-Grip® collection's textured design offers our highest anti-slip rating without the rough feel of other gritted strip boards. Perfect for by the pool, on the coast, play areas and anywhere there's rain or water.

Board size: 200 x 3600 x 32mm

➔ Slip-ups covered

Because you never know what the weather may bring, Millboard Lasta-Grip® is prepared for every eventuality. The moulded, multi-strip surface texture and Lastane® coating work together to prevent shoes slipping, even when wet, meaning that you can use and enjoy your outdoor space without any fear of slip-ups. The design also reduces any noise from moving furniture, making it the perfect choice for alfresco dining areas.

Durafix fixings

Our unique, hidden decking fixings make installing Millboard simple. There's no pre-drilling, counter sinking or clip fixings needed—all you need to do is screw them in. Once they're in, the Lastane® coating material on every Millboard simply flexes back over the fixing, leaving a virtually indistinguishable mark and creating a cleaner finish. Made from stainless steel, the screws have a self-cutting tip, six-point Torx head and are waxed for ease of use. And the drill bits are even included in the box.

Installation and User Guide

Storage and handling

Millboard should always be stored on a flat surface or level bearers a maximum of 400mm apart and stacked face-to-face, not back-to-face. Be careful not to drag the Millboard off the pallet or over each other, as this could cause abrasion or marking on the surface and only move the pallet if the Millboard is safely strapped to it. Wear gloves and long sleeves when handling Millboard and take care when lifting the boards – as Millboard is solid rather than hollow. We recommend that two people carry the boards.

Boards should be stacked face-to-face

Colour

To recreate the aesthetics of natural products, we intentionally add secondary toning colours. There may be variance within the same board or from board to board in colour tone. This means that samples cut from boards may vary from the general colour of the boarding.

With our range of colours, you can choose what is best for you. As with all products, the darker colours will feel warmer in sunny exposed locations. The lighter colours are normally used in such locations.

Whilst every care is taken to ensure consistency some colour variation from batch to batch may occur. To avoid this, we recommend that you order all you need in one delivery. If you do have different batches it is best to mix the batches to blend the colours. As with all things constantly exposed to ultra violet light and all weathers, colours will tone slightly in time, this is normal for decking. On delivery if you find the colour unacceptable or believe them to be defective in any way, do not install the boards.

Colour tone may vary from batch to batch

Joist spacing

Joist spacing of 400mm between joist centres is recommended for normal residential and light commercial use ①. On heavy commercial, bridges, balconies, moorings, doorways and steps, use 300mm between joist centres. If you need to cut Millboard down along the length, then reduce the joist centres accordingly. A minimum of three joists is required for any cut boards.

② For laying 45° to the joist, reduce the joist centres to 300mm for residential and 240mm for commercial use.

Always leave a 10mm expansion gap between ends of bearers and joists.

To install Plas-Pro frame solutions, drill the fixing holes oversize to allow the material to expand. Posts should always have a minimal of a third of their length in the ground, subject to a minimum of 400mm in the ground. Cuts must always be positioned over joists.

Installation and User Guide

Fastening to substructure

Millboard Durafix stainless steel fixings mean that there's no need to pre-drill or countersink, just screw straight in. When fixing in, push down, start the driver slowly and speed up; then slow down when driving the head of the screw through the Lastane® ③. Stop the screw about 5mm below the surface ④. This should leave a small, virtually indistinguishable hole. Failure to use our Durafix Fixings or not fitting according to these guidelines may invalidate the warranty.

Two fixings per board should be used where the board crosses a joist, we advise to use three at the ends of the boards on shorter lengths. The fixings at the ends of the boards should be fixed at a slight angle to prevent being too close to the end of the board ⑤, positioning the screws 20-25mm from the ends and 30mm from the sides of the boards. Board ends should be supported by a minimum of 20mm. As the boards are dimensionally stable, they can be fitted with only 4mm spacing and 2mm gap at the ends of the boards. Boards may have a +/- 2% dimensional variance. Best practice is to fix the boards at one end, then a fixing in the middle adjusting spacing as necessary, then the far end. Then fix to the remaining joists. We recommend working to a string line.

Cutting the Millboard

Millboard can be cut with standard saw blades, although we recommend a carbon-tipped, multi-purpose chop saw. As the formed end of the Millboard is lost when cut, these can be placed in less visual areas against a wall or edging profile. Use our Touch-up Coating (page 42) where they are visible. Dispose of off-cuts as general waste, don't burn them. When cutting the Millboard, wear a dust mask, safety glasses, long sleeves and protective gloves. A dust bag must be used on chop saws. Make sure that the Millboard is adequately supported when cutting.

Fascia boards, steps and edges

We recommend that our purpose-made edging be fitted to all steps and perimeters of the deck. It's coated with extra Lastane® for added resilience on these areas, helping prevent excessive wear. Edging is available in either a Bullnose ⑥ or Square profile ⑦. Ensure that the edging is supported on a joist by a minimum of 25mm. We recommend trimming the ends to butt tightly when fitting both edging and fascias. For the best visual effect, stagger the edging and fascia joints so that they're not in line—this creates a subtler look.

We also manufacture both styles of edgings and fascia in a flexible material, suitable for curved designs. Flexible Edgings can be curved to follow a maximum convex diameter of 3 metres. These flexible profiles need to be at least room temperature (c.20°C), then bent gently. Standard fascia will bend up to 3m convex diameter but use the flexible for tighter curves. When fixing start from the end and work along, fixing at 300mm intervals as you go. This material doesn't conceal the fixings, leaving some fixing heads partially visible.

Taking care

If the Millboard picks up marks during installation simply wash with hot, soapy water and a firm broom straightaway. To remove any cement and lime-based stains, we recommend using Geocel Brick & Mortar Cleaner. Test a small area first and follow the mixing instructions, leaving for five minutes before washing off with soapy water.

Frequently asked questions

Where can I use Millboard?

Millboard is extremely versatile and can be used in practically every outdoor space. Create decks, balconies, roof gardens, boardwalks, bridges, pontoons, seating, steps, planters and more.

Do I need to seal Millboard?

No, all Millboards are surface sealed in the factory to ensure they arrive in premium condition. In the first few weeks of use, rainwater will sit on the surface in globules, but don't worry – this is normal and will stop once the temporary surface seal breaks down.

Does Millboard mark?

The Lastane® finish is highly resistant to scratches and food and drink stains, and everyday wear and tear. Sharp objects such as unprotected table or chair legs, spiked shoes or metal planter bases can leave marks if dragged across the surface, so take care when moving these items around.

How do I clean Millboard?

Because Millboard is made of non-porous composite, it resists mossy build-up and stains, so needs very little maintenance. To remove spills and marks, simply use a mild detergent and a cloth. Just steer clear of solvents, chemicals and abrasive cleaners that could damage your Millboard – and there's normally no need for pressure washing.

What if it snows or is icy?

A small amount of granulated white salt can be used to keep your millboard ice-free. Please don't use rock salt, as this contains clay and grit and can be abrasive. When winter's over, clean the surface with soapy water and a soft broom.

Does Millboard come with a Warranty?

Yes, our 25 Year Residential limited warranty and 5 year commercial warranty gives you peace of mind against fungal and mildew decay, splitting and twisting. For more information go to www.millboard.co.uk/warranty

Is Millboard anti-slip?

Yes, in BS79.76 slip resistance tests, all styles of Millboard achieve one of the highest anti-slip ratings, even in wet conditions.

Are Millboard colours consistent?

As with all flooring, we advise buying all the Millboard you need at the same time to help ensure that the colour is as consistent as possible. If you don't order all your Millboard at once, you can blend different batches to create only subtle variation throughout your space.

Can Millboard be cut just like wood?

Millboard can be cut with standard saw blades, although we recommend a carbon-tipped, multi-purposed chop saw. As the formed end of the board is lost when cut, these can be placed in less visual areas against a wall or edging profile. Matching Touch-up Coating for exposed ends is available to buy separately. See page 42.

What fixings should be used to fix Millboard?

Following extensive trials, we recommend and supply Durafix self-drilling stainless steel screws, designed specifically for Millboard. There's no need to pre-drill or countersink Millboard and the unique Lastane® material self-heals, leaving a virtually indistinguishable mark on the surface. See pages 42 and 52.

Can you recommend an installer?

We have a nationwide network of installers who can complete the work for you. Each is chosen for their professionalism and high quality, but you should always follow normal precautions before entering into a contract with a third party, especially if a deposit payment is required.

Something else?

For any other technical, installation or care questions, go to www.millboard.co.uk, call our technical team on 024 7643 9943, or email us at enquiries@millboard.co.uk.
